

I would like to submit comments on 02-98.

1. I think power should be limited to 100 watts.
2. Only amateur Extra Class licenses should have access to the 5 MHz band.
3. I VERY STRONGLY feel the band should be divided into sub-bands one (lower frequency) for narrow band modes like CW and one for wide band modes like SSB.

Thank you for considering my comments,

Bill Everett W700
